

Grade 7 Summer Math 2019-2020

Thatquiz.org

Your summer math will be entirely on thatquiz.org, a website I have logged your class into and populated with quizzes for you. To complete your summer math you need an IXL notebook which you will use to complete your work. I will collect this in the beginning of the school year.

For each skill there is a practice link to see what the skill is like, and a test link.

All Test codes are graded and it is strongly recommended that you use the practice code before you take the actual test since the test can only be completed **ONE TIME** and it is graded.

To practice a skill paste the practice URL into the browser.

To take the test

Find the field that says "Have a test code?"

Paste your test code then find your name in the pull down menu and select your name. Once you have completed that test you will not be able to do it again. The average of these tests will count as a test grade for trimester 1. You can redo the practice as much as you like.
