

## **Summer Math Packet**

### **Grade 1 (Rising to Grade 2 in September)**

Dear Parents,

This packet of practice activities is intended to engage and excite your child with math this summer. You can help your child's learning continue over the summer by having your child do the packet, *a little at a time*, during the summer. Take time to discuss and enjoy the progress your child is making. Please return the completed packet to next year's teacher when school begins in late August.

You can also support your child's academic progress by reinforcing math concepts in daily activities (for example, counting cars, adding M&M's, measuring flour, cutting fruit into fraction sections, noticing shapes, etc.). The most important part of this is to have fun!

Sincerely,

Sue McCabe
